REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

In the amendment filed and entered upon request for continued prosecution, the applicants have limited their claims to require presence of ethylene octane copolymer. The composition of crystalline polypropylene resin, ethylene octene copolymer and rubber containing vinyl aromatic monomer satisfies conditions of a) long period obtained by small angle X-ray diffraction is 12-24 nm, b) elastomer particles undergo micro phase separation and the difference between glass transition of crystalline polypropylene homopolymer portion of the polypropylene based resin and glass transition of the composition is 4.0-7.0°C.

Since the types and amounts of the components influence the glass transition temperature of the overall composition and since the prior art does not teach ethylene-octene copolymer, the final glass transition would not be the same in the prior art of record. Therefore at least one of the conditions required by the present invention is not met by the prior art of record. In view of the above, pending claims 1, 2, 4, 5, 7-9 are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
